NOTE: CMA cable part numbers contain a **prefix** which designates the cable material as well as a **Suffix** which designates the cable construction.

Prefix: G-Galvanized or S-Stainless Steel **Suffix:** C-1x7, E-1x9, N-7x7, T-7x19 **Suffix:** D-Dry or A-Lubricated
All cable is supplied dry (D) unless otherwise specified.

PLASTICABLE

Thermoplastic Coated Cable

Cable life and/or the appearance of any assembly can be enhanced by specifying CMA PlastiCable. The pressure extruded thermoplastic coatings become an integral part of the cable and are highly recommended for use with lubricated cable in pulley applications. The coating seals out contaminants, retains cable lubrication, cushions the strands, resists abrasion and increases the life cycle capability of cable used in flexing applications. CMA's extensive background in cable coating technology and extrusion capability produces smooth, uniform and concentric coatings of high quality. Our standard "PC" resins, listed below, offer a selection of choices and colors suitable for pressure extrusion on cable. For specific recommendations based on your requirements or information on special and custom coatings, please contact CMA Sales and Engineering departments.

Standard PlastiCable Coatings

Material:	Part Number	Description	Typical Uses/Advantages
Nylon (Polyamide)	PC 100	A very flexible and abrasion-resistant resin for use in high life cycle applications. Nylon 11. Color – Slightly gray/translucent tint.	Thin wall & pulley applications – standard coating for Cycle-Flex miniature drive cables. Heat stabilized.
	PC 110	General purpose resin with adequate flexibility and abrasion resistance. Nylon 6. Color – Milky white/ green tint	Most applications for cable 1/16" & larger. Lanyards, restraint cables.
	PC 113	General purpose weather – resistant resin similar to PC 110. Nylon 6. Color - Black	Most outdoor cable uses for larger diameter cables. Heat & light stabilized.
	PC 114	Very flexible and abrasion resistant for larger diameter cables in pulley applications. Nylon 11.	High life cycle pulley applications, physical fitness equipment. Heat & light stabilized.
	PC 115	Relatively stiff, higher heat, chemical and abrasion-resistant resins. Nylon 612. Color - Clear	Cable controls, lanyards , etc.
Vinyl (polyvinyl chloride)	PC 300	General purpose PVC resistant to fatigue, high flexibility. Color- Clear	High flexibility, appearance applications. Readily color matched security cables, lanyards.
	PC 301	Color – White/Opaque.	Same as PC 300.
	PC 302	Color – Black/Opaque.	Good mechanical properties with excellent flame resistance.
	PC 303	Color – Yellow/Opaque.	Same as PC 300
	PC 304	Color – Green/Opaque.	Same as PC 300
	PC 305	Color – Blue/Opaque.	Same as PC 300
	PC 307	Color – Red/Opaque.	Same as PC 300
TPE (Thermoplastic Elstomer)	PC 904	Extrusion grade resin with rubber-like properties. Highly resistant to moisture and chemicals, good flexibility.	Good for outdoor applications, tailgate cables, parts requiring flexibility and weather resistance.

Notes: 1. Other coatings are available such as polyethylene, polypropylene, urethane, etc. Custom resins and colors are available to suit your application. Contact CMA Sales and Engineering departments for additional information.

How To Specify PlastiCable

- Select the proper bare cable diameter and part number from those listed on this page.
- Determine which "PC" resin will meet your requirements. Take into consideration cost, life expectancy, environment, etc.
- Select O.D. of coating and refer to the following for information pertaining to diameters, tolerances, and part numbers.
- PlastiCable™ part number is comprised of: bare cable part number/suffix for coating diameter followed by PC resin part number.

The CMA numbering system, shown below, permits you to specify any standard or custom diameter, PC resin or color for custom coated cable.

S125TD188113

Part Number

S	125	T	D	188	113
Cable Material (Stainless Steel)	Cable Diameter	Construction (7x19)	Lubrication (Dry)	Coating Diameter (Suffix)	PC Resin Part Number (nylon PC 113)
Stainless Steel (S) Galvanized (G)			Dry (D) Lubricated (A)		

See chart below

Note: Cycle-Flex Cable normally available in stock as pre-stretched.

NOTE: 1. Standard tolerances for all bare and coated diameters upto and including CF-3874S is $\pm .002$ " (± 0.05 mm). CF-4482S thru CF-4574S is $\pm .004$ " (± 0.10 mm).

2. Most Cycle-Flex cable can be ordered as pre-stretched. To specify pre-stretched cables add the suffix "PS" to the Cycle-flex part number.

*Note: Specified with 24 wire braid—all others specified with 12 wire braid.

**Note: This long lay has more flexibility than standard.

Legend

LINER:	WIRE:	JACKET:	COLOR:
ACE — ACETAL	SS — STAINLESS STEEL	PE — POLYETHYLENE	BLK — BLACK
PP — POLYPROPYLENE	GAL — GALVANIZED STEEL	TPE — THERMOPLASTIC ELASTOMER	NATL — NATURAL
TFE — TEFLON	RD — ROUND WIRE	PVC — POLYVINYL CHLORIDE	GRY — GRAY
NYL — NYLON	FLAT — FLAT WIRE	NYL — NYLON	

NOTE: Recommended maximum cable and solid wire cores are based on the inside diameter of the conduit. Variations in control installations and mounting may require smaller or larger core diameters for proper function.

CMA Remote Actuation Systems ACTUATORS

CMA 11603 – Lever Actuator

- Compact molded housing with vertical lever for fingertip actuation
- Recessed mounting with two bezel holes
- Easily assembled to CMA standard cable controls. Cable fitting permanently snaps into lever handle.

2:1 Mechanical advantage

9/16" (14.3 mm) travel

Material: ABS/glass filled nylon

Color: Black

NOTE: For locking gas spring applications, when used with CMA 11602, 11708, or 12030 – specify a gas spring with quick release valve (1mm travel).

Use Molded End No. 1

CMA 11764 – Mini Lever Actuator

- Molded compact design for recessed mounting
- Contoured handle for easy two-finger operation
- Optional cable control assembly locations for flexible routing in vertical or horizontal applications
- Integral return spring
- Bezel or pocket mounting holes
- Easily assembled to CMA standard cable controls

Position "A" 3.5:1 Mechanical advantage

.750" (19.0 mm) travel

Position "B" 4:1 Mechanical advantage

.750" (19.0 mm) travel

Material: ABS/polycarbonate

Color: Black

Use Molded End No. 4

CMA Remote Actuation Systems ACTUATORS

CMA 11605 – Lever Actuator

- Molded design for recessed mounting with larger lever for ease of actuation
- Optional cable control assembly locations for flexible routing in vertical or horizontal installations or two cable controls at the same time.
- Pocket mounting holes and return spring are standard
- Easily assembled to CMA standard cable controls

Position "A" 2:1 Mechanical advantage

.840" (21.3 mm) travel

Position "B" 1.7:1 Mechanical advantage

1.300" (33.0 mm) travel

Material: ABS/polycarbonate

Color: Black

Use Molded End No. 3

CMA 11604 – Push Button Actuator Round Button/Bezel

- Molded design with large push button for finger or palm actuation
- Adjustable trim ring accommodates mounting surface thickness
- Rear or front surface 4-hole mounting plate
- Integral return spring (optional)
- Supplied assembled to CMA standard cable controls

.480" (12.4 mm) travel

Material: Engineering grade thermo-plastics

Color: Black

NOTE: For locking gas spring applications, when used with CMA 11602, 11708, or 12030 – specify a gas spring with quick release valve (1mm travel).

Use Molded End No. 3

CMA Remote Actuation Systems ACTUATORS

CMA 12074 – Push Button Actuator

- Compact small size for light duty applications only
- Spring loaded mounting bezel accommodates up to .120 thick material

.195" MAX (4.95 mm) travel

1:1 Mechanical advantage

Material: Aluminum/Delrin

Finish: Clear anodize

Use End No. 12

CMA 12129 – Lever Handle/Tube Mount

- Molded and contoured design offers ease of use and maximum actuation force
- Readily mounts to round tubing with one screw
- Easily assembled to CMA standard cable controls
- Positive snap fit conduit-locking feature

12129 – 1 Fits 3/4" round tubing

12129 – 2 Fits 1" round tubing

12129 – 3 Fits 7/8" round tubing

2.5:1 Mechanical advantage

.800" (20.3 mm) travel

Material: Glass filled nylon

Color: Black

Requires #8 type B sheet metal screw

Use Molded End No. 13

CMA Remote Actuation Systems ACTUATORS

CMA 11767 – D-Ring/Bracket

- Molded design with wide D shape configuration for ease of use in straight pull applications
- Shuttle molded 6-hole hanger bracket for easy mounting to flat surfaces
- Square steel handle shaft eliminates rotation

1.25" MAX (31.75 mm) travel

Material: Polypropylene/Acetal/Steel

Color: Black

Use Molded End No. 7

CMA 12073 – T-Handle/Bracket

- Molded design with easy to grip "T" handle for ease of use in straight pull applications
- Shuttle molded 6-hole hanger bracket for easy mounting to flat surfaces
- Square steel handle shaft eliminates rotation

1.25" MAX (31.75 mm) travel

Material: Polypropylene/Acetal/Steel

Color: Black

Use Molded End No. 7

CMA Remote Actuation Systems ACTUATORS

CMA 12169 – Surface Mount Lever Actuator

- Sturdy design with contoured pull up handle
- Easy mounting to the underside of flat surfaces
- Mounting bracket has 2 molded slots for easy installation and adjustment
- Easily assembled to CMA standard cable controls

2.5:1 Mechanical advantage

.625" (15.9 mm) travel

Material: ABS

Color: Black

Use Molded End No. 4

CMA Remote Actuation Systems OPERATORS

CMA 11602-10 – Locking Gas Spring Operator – 10 MM Rod End

- Molded design for lightweight and ease of assembly
- Used for operating rod end valve stem on locking gas springs
- For use with custom rod end mounting bracket for unique installations
- Designed for intermittent non preload operation of gas spring valve stem
- Readily assembled to CMA standard cable controls

1.57:1 Mechanical advantage

Material: Glass filled nylon

Color: Black

NOTE: For locking gas spring applications, when used with CMA 11603 lever, CMA 11604 push button or CMA 11704 push button – specify a gas spring with quick release valve (1mm travel).

Also available: CMA 11602-8 Locking Gas Spring Operator for 8mm Rod End

Use Molded End No. 2
or No. 11 for Adjustment

CMA 11708-P110 – Locking Gas Spring Mounting Bracket/Operator – 10 MM Rod End

- Integral swivel mounting bracket and operator
- Accepts 8mm Diameter Mounting pin for commonality with gas spring blade end
- Designed to function with locking gas springs up to 1000N applications
- Easily assembled to CMA standard cable controls

5:1 Mechanical advantage

Material: CRS Steel

Finish: Zinc plating with clear chromate

NOTE: For locking gas spring applications, when used with CMA 11603 lever, CMA 11604 push button or CMA 11704 push button – specify a gas spring with quick release valve (1mm travel).

Also available: CMA 11708P – 108 (8mm), CMA 11708P – 10 (10mm) and 11708P – 8 (8mm) Locking Gas Spring Mounting Bracket/Operators for use on Gas Springs with Straight Valve Pin.

Use Molded End No. 2

CMA Remote Actuation Systems OPERATORS

CMA 12030-10 – Heavy Duty Locking Gas Spring Operator

- Heavy gauge bracket suitable for higher force locking gas springs and high load mounting geometry
- Supplied assembled to CMA cable controls
- For use with 10 mm diameter rod end gas springs

4.5:1 Mechanical advantage

Material: CRS Steel

Finish: Zinc with clear chromate

NOTE: For locking gas spring applications, when used with CMA 11603 lever, CMA 11604 push button or CMA 11704 push button – specify a gas spring with quick release valve (1mm travel).

Use Molded End No. 2

CMA 12076-10 – BLOC-O-LIFT® Release Mechanism

- Compact release head for space constrained applications
- For use with Stabilus BLOC-O-LIFT locking gas springs only
- Assemblies to CMA custom cable controls
- Recommended for use with a maximum of 500N force BLOC-O-LIFTS

2.32:1 Mechanical advantage

Material: Die cast zinc/aluminum

Finish: As Cast

Also available: CMA 12076-8 (8mm)

Release Head: 10mm – Stabilus P/N 784575 8mm – Stabilus P/N 983918

Lever: Used for both – Stabilus P/N 783234

Use Molded End No. 10

CMA Remote Actuation Systems OPERATORS

CMA 12077 – Compact Locking Gas Spring Operator

- For use with special rod end Stabilus BLOC-O-LIFT® locking gas springs in specialty seating applications
- Compact design for space constrained applications
- Supplied assembled to CMA standard cable controls

3.5:1 Mechanical advantage

Material: Glass filled nylon/C1070 Steel

Use End No. 9

CMA 81-222P – Dual Cable Control Adapter

- Design permits multiple actuator or operator use
- Bracket mounts to flat surface with two mounting holes provided
- Easily assembled to CMA standard cable controls
- Used with conduit end No. 6 which provides adjustability to remove cable slack and to balance system

Material: C1010 Steel

Finish: Zinc plating with clear chromate

Use Molded End No. 5
and End No. 6

No. 5

No. 6

CMA Remote Actuation Systems OPERATORS

CMA 99-SERIES – Conduit Clamps

- Suitable for use with CMA cable controls
- Single fastener installation
- Dimples keep conduit positioned

Material: Galvanized steel
